

Municipal Board Empowerment Series Workshop #4 Coastal Viewer 101 for Land Conservation

Learn how to use exciting new data from The Nature Conservancy that prioritizes areas to conserve that protect our drinking water supplies, reduce flooding, and keep Great Bay clean.

September 6, 2017 6:00-8:00 PM

UNH Pettee Hall, Room G18
55 College Road Durham, NH

Free parking is available at the Edgewood Road Visitor Lot, 5 Edgewood Road, Durham

Participants will be introduced to the NH Coastal Viewer, a web-based mapping tool that provides access to data about NH's coastal resources, hazards, and resilient landscapes. The workshop will include a series of hands-on exercises to familiarize participants with the Viewer's data and tools. By the end of the workshop, participants will be able to access the Viewer, explore data relevant to coastal land conservation, and make simple maps focused on conservation priorities in their communities, including exciting new datasets that prioritize conservation areas for drinking water.

**Please bring your own laptop if possible. There will be 4-5 computers available for those who do not have one. We recommend using the Chrome browser loaded on your laptop. Other browsers are useable, but may not provide optimum performance.

Workshop is **free** of charge, suggested donation of \$5, and you must register to participate. Email Steve Miller at steve.miller@wildlife.nh.gov to register with your name, position, organization, and contact information (email and phone).
