AIR QUALITY
MONITORING STATIONS

September 2012

- 1 GREENS GRANT (AMC/DES/USFS), CAMP DODGE
- 2 SARGENTS PURCHASE (DES), MT WASHINGTON SUMMIT
- 3 WOODSTOCK (DES/HBRF/CASTNET), HUBBARD BROOK
- 4 LEBANON AIRPORT (DES)
- 5 LACONIA (DES), GREEN STREET
- 6 CONCORD (DES), HAZEN DRIVE
- 7 PEMBROKE (DES), PEMBROKE HIGHWAY GARAGE
- 8 PORTSMOUTH (DES), PIERCE ISLAND
- 9 RYE (DES), SEACOAST SCIENCE CENTER
- 10 KEENE (DES), WATER STREET
- 11 LONDONDERRY (DES), MOOSE HILL SCHOOL
- 12 PETERBOROUGH (DES), MILLER STATE PARK
- 13 NASHUA (DES), CROWN STREET
- 14 NASHUA (DES), GILSON ROAD

How do we measure Air Pollution in New Hampshire?

NH Department of
Environmental Services

Air Monitoring Stations

- 14 different locations
- Measure various pollutants and meteorological parameters
- Ozone, nitrogen oxides, small particles, sulfur dioxide, carbon monoxide, and volatile organic compounds (VOCs)

Londonderry – Moose Hill School

- 9 panels – 1800 W
- Panels didn't power entire station
- Keeps us under peak demand
- Added more equipment
- Adding 16 more panels – 4240 W

Pack Monadnock Miller State Park

Solar Panels being installed on
Pack Monadnock Air Monitoring Station

- 14 panels – 3710 W total
- Will provide 37% of the stations' energy

Solar Power at Air Monitoring Stations

- Utilized state capital energy efficiency funds, DES funds and PUC's rebate program
- Provide educational information at both locations
- Educate the public about air quality & how energy efficiency & solar power can be used to decrease pollution
- Support the use of solar power generation
- Save the state \$
- Save NH tax payers!
