

2017 NH Coastal Climate Summit: Partnering Research with Local Action

Thursday, May 25, 2017

8:30am-3:00pm

Hugh Gregg Coastal Conservation Center, 89 Depot Road, Greenland, NH

[REGISTER HERE](#)

Registration fee: \$15 to cover lunch and refreshments

Please register by 5pm on Monday, May 22

Invitation-Only Event for Scientific Researchers and Municipal Staff, Board, and Commission Members: Help shape the next generation of collaborative projects for building resilience in coastal New Hampshire

- Hear from researchers, municipal leaders, and members of the NH Coastal Adaptation Workgroup about their experiences with community-researcher collaborations in coastal NH
- Help identify knowledge gaps and opportunities for beneficial projects that meet both municipal needs and researcher interests related to climate adaptation
- Meet potential project partners

The 2017 NH Coastal Climate Summit is different from past summits and is inspired by input from researchers and community leaders who would like to work together more collaboratively. The Summit will result in a draft research agenda to guide collaboration priorities in the region.

This summit is organized by the NH Coastal Adaptation Workgroup. Learn more at nhcaw.org.
