## **Vulnerability Worksheet: A Quick Assessment**

## What is at risk in your community from the effects of climate?

BUILT INFRASTRUCTURE: e.g. bridges, roads, stormwater systems, wastewater treatment plants, buildings, telecommunication lines, etc.

PUBLIC SERVICES and PUBLIC HEALTH: e.g. water supply, parks and recreation, public access, public health services, disease control, etc.

NATURAL RESOURCES (and their services): e.g. rivers, wetlands, forests, fields, estuaries, wildlife, marine and aquatic species, etc.

LOCAL ECONOMIES: e.g. fish and shellfisheries, tourism, agriculture, marine industries, water-based commerce, etc.

CULTURAL RESOURCES (and community character): e.g. historic structures, features & places of interest, archeological sites, scenic byways, art & artifacts, etc.

TA	KΙ	N	G	AC	TI	$\cap$	N	ľ

1.	List one thing that could be done to make your community more prepared for climate effects.
2.	Name three groups or individuals who would need to be involved in the climate planning discussion
a.	
b.	
c.	
3.	How would you engage each group or individual listed above?
