| Registration | Workshop is FREE but space is limited. Register by 10/2: http://tinyurl.com/CAWdunesworkshop Questions? Alyson.Eberhardt@unh.edu 603-862-6709 |

Free dune plants! Join us to learn about a free resource available to NH coastal landowners to increase the resilience of their own property - the Common Garden of native sand dune plants at Hampton Beach State Park. A brief presentation and discussion will be followed by a visit to the Common Garden. Join fellow Seacoast community members and leaders to:

- Learn about the Common Garden as a free resource of sand dune plants and info for local landowners
- Have questions answered about NH's sand dunes and about planting dune vegetation on your property
- Visit the Common Garden to harvest dune plants for interested homeowners and review planting methods

Presenters include: Sherry Godlewski (NH Department of Environmental Services), Alyson Eberhardt (NH Sea Grant/ UNH Cooperative Extension), David Burdick (UNH Jackson Estuarine Lab), Gregg Moore (UNH Jackson Estuarine Lab)
