

The Northeast Regional Resilience Living Shorelines Project presents:

# Engineering Living Shorelines in Tidal New Hampshire:

a workshop for engineers, consultants &  
landscape architects

**Thursday Oct. 26, 2017**

**9:00 AM to 3:00 PM**

**PORTSMOUTH PUBLIC LIBRARY LEVENSON ROOM**

***WITH FIELD TRIP TO***

***THE CUTTS COVE LIVING SHORELINE PROJECT***

## Workshop Objectives:

- Learn beyond the basics about living shoreline (LS) approaches for tidal erosion control, habitat restoration and enhancement, and flood mitigation.
- Understand differences between LS stabilization and traditional, hard shoreline stabilization.
- Obtain strategies and regulatory knowledge to help execute successful LS projects.
- Identify challenges and next steps to encourage design and implementation of LS projects on public and private properties.
